an eye opening and vital account of the future of our earth and our civilisation if current rates of global warming persist by the highly acclaimed author of *high tide*

mark lynas delivers an alarming account of the future of our earth and our civilisation if current rates of global warming persist we are living in a climate emergency but how much worse could it get

the sacramental and prophetic traditions of christian spirituality suggests matthew eggemeier possess critical resources for responding to the contemporary social

crises of widespread ecological degradation and the innocent suffering of the crucified poor in a sacramental prophetic vision eggemeier maintains that the vital key for cultivating these traditions in the present is to situate these spiritualities in the context of spiritual exercises or ascetical practices that enable christians to live more deeply in the presence of god coram deo and in turn to make this presence visible in a suffering world

the essential resource for middle and high school english language arts teachers to help their students understand and address the urgent issues and challenges facing life on earth today this text features classroom activities written and used by teachers and a website climatechangeela pbworks com with additional information and lineks all royalties from the sale of this book are donated to alliance for climate education acespace org

climate change is changing the way winemakers make wine once temperate grape growing regions are growing hotter challenging winemakers to produce high quality wines in unfamiliar ways many of the negative effects of climate change on the wine world are already apparent european vineyards in the heart of traditional winemaking areas for example are suffering lower yields due to increasing temperatures but new opportunities are also presenting themselves areas in europe and the americas that could not successfully produce *vitis vinifera* grapes are becoming important players in the new world of wine this book will explore climate change in a wine producing context discussing why climate is important to grape growing and how climatic changes can affect grapes and wine it will cover each major wine region in the world analyzing the likely trends and their responses and it will cover the ways wine producers are coping with this very quickly changing landscape all this is central to the world of wine and centrally important to those who enjoy wine s complexity and variety
